

ASHIMA ADYA

<https://www.linkedin.com/in/ashima-adya/> | 6049082609 | Vancouver, BC | ashima.adya@gmail.com | <https://github.com/AshimaAdya>

Senior Software Engineer with **8+ years of experience** building **large-scale data platforms, distributed backend systems, and real-time streaming pipelines**. Deep expertise in **Java, Spring Boot, Kafka, Flink, Apache NiFi, AWS, Azure, Kubernetes, and cloud-native microservices**. Proven track record leading the design and operation of **high-reliability, low-latency systems**, driving architecture decisions, improving observability, and delivering scalable data pipelines that power business-critical analytics and customer-facing platforms.

Skills

- **Languages & Backend:** Java, Scala, Python, Spring Boot, REST APIs, Microservices, Distributed Systems
- **Data & Streaming:** Kafka, Apache Flink, Apache NiFi, Databricks, ETL, Real-Time Streaming, Event-Driven Architecture, SQL, SQS, RabbitMQ, ActiveMQ
- **Cloud & Infrastructure:** AWS, Azure, Docker, Kubernetes, AKS, CI/CD, Git, kubectl, kind
- **Databases:** PostgreSQL, MongoDB, Cosmos DB, MySQL, Redis, NoSQL Data Modeling
- **Observability & Reliability:** Prometheus, Grafana, Alerting, Monitoring, SLOs, Incident Response, Performance Optimization
- **Engineering:** System Design, Scalable Architecture, Technical Leadership, Testing (JUnit, Mockito), Agile, Security

Experience

Senior Software Engineer Zafin *Vancouver, BC, Canada* **03/2023 - Present**

- Lead the design, development, and operation of **distributed microservices and data workflows** using **Java, Spring Boot, Apache Flink, and Apache NiFi**, enabling secure integration between legacy banking platforms and client ecosystems.
- Architect and build **real-time data pipelines and streaming workflows** for dynamic rate provisioning, tier determination, and customer lifecycle analytics, improving customer retention outcomes.
- Drive **system architecture and cross-team design discussions**, defining end-to-end data flows, service boundaries, and long-term platform scalability strategies.
- Own **Azure AKS cluster operations**, including deployment automation, autoscaling, ingress/egress configuration, production troubleshooting, and high-availability rollout strategies.
- Implemented **observability best practices** with Prometheus and Grafana dashboards, alerting, and SLO monitoring, reducing incident response time by **30%**.
- Identify and reduce technical debt across services through refactoring, deployment standardization, and performance improvements.
- Led and mentored a team of **5 engineers**, driving engineering standards, code quality, and architectural alignment across teams.

Senior Software Engineer Gainsight *Bengaluru, KA, India* **07/2019 - 06/2022**

- Built and operated a **cloud-native large-scale data ingestion platform** using **Java, AWS, MongoDB, RabbitMQ, and PostgreSQL**, improving system reliability by **20%**.
- Designed scalable **metadata enrichment and auto-correction pipelines** to improve data quality and reduce synchronization errors by **40%**.
- Developed an **integration platform framework (iPaaS)** for onboarding multiple enterprise connectors, enabling a **10x expansion** in service integrations.
- Designed and maintained **Kafka-based real-time event streaming pipelines** for near real-time synchronization between Salesforce and Gainsight systems.
- Improved long-term platform maintainability by identifying system bottlenecks, optimizing data flow performance, and reducing technical debt.
- Provided technical leadership through architecture reviews, code reviews, deployment support, and production escalations.

Software Engineer ITC Infotech *Bengaluru, KA, India* **08/2015 - 08/2017**

- Developed scalable **backend services and REST APIs** using **Java and Spring Boot** in Agile delivery environments.
- Refactored legacy services and expanded unit/integration test coverage using **JUnit and Mockito**, improving maintainability and Sonar quality metrics.
- Built a **multi-currency financial conversion service** supporting distributed reporting workflows across enterprise systems.

Education

Master of Technology (Gold Medalist)	<u>National Institute Of Technology</u>	<i>Jalandhar, PB, India</i>	08/2017 - 07/2019
Bachelor of Technology	<u>Chandigarh College of Engineering</u>	<i>Mohali, PB, India</i>	08/2011 - 07/2015
